

What's new

Orange is the new green

ORANGE Power's range of environmentally responsible cleaning products is set to expand with the launch of Australia's first ever 4x concentrate natural enzyme laundry, and the good news is that it's kinder to the environment and formulated specifically for greywater use.

The new product is Orange Power's first foray into the laundry liquid category, however, it has had a successful pre-wash stain remover on the market for some years. Like most of its products, the Orange Power 4x Concentrate Natural Enzyme Liquid is bursting with 'green credentials.' It's made from natural ingredients which include biodegradable soap and plant-based enzymes, and is one of the lowest laundry liquids in pH, phosphates and sodium.

In addition to being safe for greywater use, the laundry liquid is also non-toxic to waterways. Its packaging is completely recyclable and is much smaller than most bottles, thereby saving energy in manufacturing and transportation.

Both laundry packs contain no preservative or dyes and a Fragrance Free version is

available. The new laundry liquid retails for \$5.49 and will be available from Coles and Bi-Lo stores, as well as other leading independent retailers.

Don't scratch the itch

MOSQUITO-Click is a chemical-free way to stop the itchiness and inflammation of mosquito, sandfly, bull ant – and even jellyfish – stings.

Too often we can find that our summer nights can be spoiled by itchy mosquito bites. If we (or the kids) give in to temptation and scratch we can end up with skin irritations that can be more serious than the initial bite. That's where the great little gadget, Mosquito-Click can help.

The Mosquito-Click is made in Italy and clinically trialed. It works using a sort of mini electric shock – but it doesn't hurt! You just hold the device like a pen, point the narrow end on the bite and click to stop the itching. Another few clicks can stop the swelling as well.

Perfect for everyone, but especially for

people who get an allergic reaction to mozzie bites and for children (from 6 months), Mosquito-Click is small enough to carry everywhere with you.

The Mosquito-Click is available for \$19.95 from Kmart, My Chemist, Ray's Outdoors, Chemist Warehouse, Aussie Disposals, Mitchell Disposals, Bakpakka, Down Under Camping, Lyal Eales Stores and other good chemists and outdoor/camping stores.

No smoke or flare-ups

THE new Ascona Gas Kettle Barbecue has a unique funnel system that eliminates flare-ups and unpleasant smoke. Placed inside the barbecue, the funnel directs the heat along the inside walls of the kettle to produce a slow even heat or, for a highly concentrated heat, turn the funnel around and it is perfect for roasting or grilling.

The funnel allows you to keep the food away from direct heat if you prefer – that way you can keep the lid

closed and there is no need to turn the food. Which leaves more time to drink beer and relax.

It comes in black and the RRP is \$498. It is available from Bunning's nationally or, to find out the store nearest you visit www.bunnings.com.au

A waterproof way to capture the moment

THE Sanyo VPC-CAG5EXW waterproof movie camera is the perfect present for loved ones who like the outdoors. The first movie camera that is waterproof without the need for an external housing accessory, the VPC-CA65 allows users to record their underwater adventures to a depth of 1.5 metres – ideal for water-based sports including surfing, snorkelling, kayaking, canyoning and general boating enthusiasts.

With a high 6.0 megapixel resolution, 5x optical and 12x digital zoom, the Sanyo VPC-CA65 perfectly captures those precious moments and memories in high quality, vivid detail, even when taken from a distance. It retails from \$699.
